Looker E-commerce Analysis: Business Insights & Strategic Recommendations

Insights:

1. Generated total $10,827,118.91 in total sales across 125,226 orders.
2. Outerwear & Coats and Jeans are the top revenue drivers.
3. Channel performance is highly balanced, with Facebook leading conversion rates at 26.95%, closely followed by Email (26.67%), Organic (26.60%), and Adwords (26.60%).
4. Sales distribution is perfectly balanced between Men (50%) and Women (50%) departments.
5. Total traffic reached **681,759 sessions**, resulting in **100,000 customers** and **80,044 completed orders**.
6. Channel efficiency is evenly balanced across sources.
7. A critical conversion drop occurs between the **Product/Cart stage** and the final **Purchase stage**.
8. **Sell-Through Efficiency:** Achieved a **37% Sell-Through Rate**, selling **181,759 units** out of **490,705 total stock items**.
9. **Stock Availability: 308,946 units** remain available in stock.

Recommendations:

1. Deploy automated email & SMS retargeting workflows specifically targeting customers who drop off at the Cart stage to recover lost sales.
2. Reallocate a larger portion of ad spend toward **Facebook** and **Email marketing** due to their higher conversion performance.
3. Reduce stock holding costs for low-performing categories by introducing promotional discounts or bundling strategies.
